

MAUTC Publications 1999-2006

REPORTS

ADA-Compliant Passenger Rail Car Designs to Maintain Full Freight Service (including Excess Dimension Load) Clearances and Meet Restrictive Northeastern Passenger Rail Line Vertical Clearances, by E. K. Morlok, University of Pennsylvania, Technical Report, August 2003.

Analysis of the Great Lakes St. Lawrence River Navigation Systems Role in Ocean Container Trade, by E. Thomchik, G. Gittings, J. Spsychalski, and C. Cassano, 2003.

Analysis of Thermal Induced Stresses Induced in Dowel Transverse Joints, by S. Shoukry and G. William, West Virginia University, proceedings of the ASCE Airfield Pavement Conference, Chicago, Illinois, 2001, pp. 373-384.

Application of Dynamic Relaxation in Thermo-Elastic Structural Analysis of Highway Pavement Structures, by S. Shoukry, G. William, and M. Riad, Proceedings: Eighth International LS-DYNA User's Conference, Dearborn, Michigan, 2006.

Assessment of Advanced Engine Technology for the University of Virginia Transit System, by J. Lamb and R. Espino, University of Virginia, Final Report, October 2000, 21 pp.

Assessment of the Performance Rigid Pavement Backcalculation Through Finite Element Modeling, by S. Shoukry, G. William, and D. Martinelli, West Virginia University, Proceedings of the SPIE Conference on Nondestructive Evaluation of Bridges and Highways III, Vol. 3587, California, 1999, pp. 146-156.

Bicycle-Friendly Shoulder Rumble Strips, by L. Elefteriadou, M. El-Gindy, D. Torbic, P. Garvey, A. Homan, Z. Jiang, B. Pecheux, and R. Tallon, The Pennsylvania State University, Final Report, March 2000, 117 pp.

Calibration of the Gravity Model for Truck Freight Flow Distribution, by S. Mao and M. Demetsky, University of Virginia, Final Report, August 2002, 53 pp.

Characteristics of Concrete Contact Stresses in Doweled Transverse Joints, by S. Shoukry, G. William, and M. Riad, West Virginia University, The International Journal of Pavement Engineering, Vol. 3, No. 2, 2002, pp. 117-129.

Comparison of Mobile5a, VT-Micro, and CMEM Models for Estimating Hot-Stabilized Light Duty Gasoline Vehicle Emissions, H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, accepted for publication in the Canadian Journal of Civil Engineering (CJCE), 2003.

Crash Characteristics at Work Zones, by M. Zhao and N. Garber, University of Virginia, Final Report, May 2001, 62 pp.

Deploying an ITS Warning System for No-passing Zones on Two-lane Rural Roads, by J. El-Zarif, Virginia Polytechnic Institute & State University, Final Report.

A Discrete Optimization Approach for Locating Automatic Vehicle Identification Readers for the Provision of Roadway Travel Times, by H. Sherali, J. Desai, H. Rakha, and I. El-Shawarby, tentatively accepted for publication in Transportation Research Part B: Methodological, 2003.

Dynamic Backcalculation of Pavement Layer Moduli, by S. Shoukry and G. William, West Virginia University, Proceedings: ASNT Spring Conference and 8th Annual Research Symposium, American Society of Nondestructive Testing, Florida, 1999, pp. 43-45.

Dynamic Relaxation: A Technique for Detailed Thermo-Elastic Structural Analysis of Transportation Structures, by S. Shoukry, G. William, M. Riad, and K. McBride, West Virginia University, International Journal of Computational methods in Engineering Science and Mathematics, Vol. 7, No. 4, pp. 303-311.

Effect of Dowel Bar Looseness on Measured Load Transfer Efficiency Using FWD, by S. Shoukry, G. William, and M. Riad, West Virginia University, Proceedings of SPIE Conference on Smart Systems for Bridges and Highways, Vol. 4330, 2001, pp. 505-510.

Effect of Thermal Stresses on Mid-Slab Cracking in Dowel Jointed Concrete Pavements, by S. Shoukry, M. Fahmy, J. Prucz and G. William, West Virginia University, Journal of Structures and Infrastructure Engineering, DOI: 10/1080/15732470500253214.

Efficient Simulation Algorithms for Optimizing the Reliability of Transportation Network System Capacity, by J. Lin and C.H. Chen, University of Pennsylvania, Electrical and Systems Engineering Department, Working Paper, 2003.

Estimating the Supply and Demand for Commercial Heavy Truck Parking on Interstate Highways: A Case Study of I-81 in Virginia, by N. Garber, H. Wang, and D. Charoenphol, University of Virginia, Final Report, October 2002, 66 pp.

Estimating Vehicle Fuel Consumption and Emissions Based on Instantaneous Speed and Acceleration Levels, by K. Ahn, H. Rakha, A. Trani, and M. Van Aerde, Virginia Polytechnic Institute & State University, ASCE Journal of Transportation Engineering, Vol. 128(2), March/April 2002, pp. 182-190.

Evaluating ITS Parking Management Strategies: A Systems Approach, by R. Maccubbin and L. Hoel, University of Virginia, Final Report, May 2000, 93 pp.

Evaluation of the Pennsylvania Turnpike's Advanced Traveler Information System (ATIS) Project, Phase III, by M. Patten, K. Goulias, and O. Pribyl, The Pennsylvania State University, Final Report, July 1, 2003, pp. 154.

Evaluation of Traveler Diversion Due to En-Route Information, by R. Schiesel and M. Demetsky, University of Virginia, Final Report, May 2000, 61 pp.

Finite Element Evaluation of the Structural Integrity of Composite Concrete-Steel Bridge Decks, by S. Roche and C. Orozco, University of Virginia, Final Report, July 2001.

HOV Corridor Evaluation and Improvement, by J. Ma and L. Hoel, University of Virginia, Final Report, April 2002, 60 pp.

Impact of Vehicle Stops on Hot Stabilized Light-Duty Vehicle Energy and Emission Rates, by H. Rakha and Y. Ding, Virginia Polytechnic Institute & State University, ASCE Journal of Transportation Engineering, Vol. 129(1), Jan./Feb. 2003, pp. 1-10.

Instrumentation and Health Monitoring of Star City Bridge, West Virginia, by S. Shoukry, M. Riad, G. William, West Virginia University. Proceedings of 2005 New York City Bridge Conference, Bridge Engineering Association, New York, New York.

The INTEGRATION Modeling Framework for Estimating Mobile Source Emissions, by H. Rakha and K. Ahn, Virginia Polytechnic Institute & State University, accepted for publication in the ASCE Journal of Transportation Engineering, TE-22744, 2003.

Intelligent Transportation Systems Research and Development Fellowship Program at the Pennsylvania State University, by K. Goulias, The Pennsylvania State University, Final Report, August 2000, 13 pp.

Investigating the Application of a GIS Database to Address Statewide Freight Transportation Planning, by B. Shannon and M. Demetsky, University of Virginia, Final Report, April 2002, 34 pp.

An Investigation of Web-Based Technologies for the Peninsula Transportation District Commission, by B. Revels and B. Smith, University of Virginia, Final Report, May 2000, 70 pp.

Mechanistic Evaluation of the Depth to Bedrock and its Effect on the Response of 3D Finite Element Pavement Model, Pavement Subgrade, Unbound Materials, and Nondestructive Testing, by G. William and S. Shoukry, West Virginia University, 2000 Geotechnical Special Publication, No. 98, ASCE, Denver, Colorado, pp. 73-86.

Methodology for Forecasting Transit Demand at an Urban Research Park, by S. Hkawn N-Sang and M. Demetsky, University of Virginia, Final Report, May 2002, 16 pp.

A Methodology for Oversized Vehicle Trip Scheduling, by C. Xu and L. Hoel, University of Virginia, Final Report, May 2001, 73 pp.

Modeling and Forecasting Vehicular Traffic Flow as a Seasonal Stochastic Time Series Process, by B. Williams and L. Hoel, University of Virginia, Final Report, June 1999, 243 pp.

An Overview of Pennsylvania's Statewide Long-Range Transportation Plan (PennPlan), by K. Goulias, J. Smedley, R. Heaney, P. Everett, G. Dauber, T-G. Kim, and K. Viswanathan, The Pennsylvania State University, Final Report, July 2000, 36 pp.

Ozone Formation Attributable to Emissions from Rural Interstate Traffic, by S. Jones, Jr., M. Demetsky, and J. Fuentes, University of Virginia, Final Report, May 2001, 143 pp.

The Parcel Service Industry in the U.S.: Its Size and Role in Commerce, by E. Morlok, B. Nitzberg, K. Balasubramaniam, and M. Sand, University of Pennsylvania, Final Report, August 1, 2000, 110 pp.

The Pennsylvania Quality Initiative: A Synthesis of Customer Satisfaction and Additional Research Needs, by T. Poister, The Pennsylvania State University, Final Report, October 1999, 44 pp.

Pennsylvania Rail Freight Assistance Program, by G. Gittings, The Pennsylvania State University, Application for Assistance, July 1993, 19 pp.

Pennsylvania Road Safety Audit Pilot Program, by M. Pietrucha and P. Garvey, The Pennsylvania State University, Final Report, March 1999, 38 pp.
Performance Evaluation of Backcalculation Algorithms through 3D Finite Element Modeling of Pavement Structures, by S. Shoukry and G. William, West Virginia University, Journal of Transportation Research Board No. 1655, TRB, National Research Council, 1999, pp. 152-160.

The Population Biology of the Spotted Salamander, *Ambystoma Maculatum*, Inhabiting Penn State Erie Wetlands, by P. Silver, A. Campbell, and J. Cooper, Final Report, October 1999, 58 pp.

Predicting Crashes from Increased Signalization: Prototype Software for Corridor Planning, by S. Kim, University of Virginia, Final Report, August 2001, 28 pp.

Quantifying the Benefits of Active Incident Management in Rural Areas, by H. Rippeon, J. Miller, and M. Demetsky, University of Virginia, Final Report, May 1999, 32 pp.

Road Quality Thresholds from the Motorist's Perspective, by P. Garvey, M. Pietrucha, R. Ghebrial, The Pennsylvania State University, and T.H. Poister and C. Smith, Final Report, December 2003, 76 pp.

Safety Impacts of Differential Speed Limits - Phase I: Determining the Safety Effects of Differential Speed Limits on Rural Interstate Highways Using

Empirical Bayes Method, by X. Sun and N. Garber, University of Virginia, Final Report, May 2002, 108 pp.

Safety Impacts of Differential Speed Limits - Phase I: Effects of Differential Speed Limits on Vehicle Speed and Crash Characteristics Using Hypothesis Tests, by B. Yuan and N. Garber, University of Virginia, Final Report, May 2002, 71 pp.

Spatial Analysis Tools for Integrated Transportation Data: Northern Virginia Intelligent Transportation Systems Prototype, by M. Grimes and B. Smith, University of Virginia, Final Report, May 2002.

Test Plan: Motor Carrier Focus Groups - Evaluation of the Pennsylvania Turnpike Advanced Travelers Information System (ATIS) Project, Phase III, by M. Patten and K. Goulias, The Pennsylvania State University, Final Report, April 2001, 14 pp.

Test Plan: Motorist Survey - Evaluation of the Pennsylvania Turnpike Advanced Travelers Information System (ATIS) Project, Phase III, by M. Patten and K. Goulias, The Pennsylvania State University, Final Report, April 2001, 36 pp.

Test Plan: Survey of Transportation System Operators - Evaluation of the Pennsylvania Turnpike Advanced Travelers Information System (ATIS) Project, by M. Patten and K. Goulias, The Pennsylvania State University, Final Report, April 2001, 26 pp.

Test Plan: Truck Driver Survey - Evaluation of the Pennsylvania Turnpike Advanced Travelers Information System (ATIS) Project, by M. Patten and K. Goulias, The Pennsylvania State University, Final Report, April 2001, 25 pp.

3D Finite Element Analysis of Temperature Induced Stresses in Dowel Jointed Concrete Pavements, by G. William and S. Shoukry, West Virginia University, The International Journal of Geomechanics, Vol. 1, No. (3), 2001, pp. 291-307.

Transit Demand Forecasting for Research Parks, by S. N-Sang and M. Demetsky, University of Virginia, Final Report, June 31, 2002.

Transportation for Livable Cities, by V. R. Vuchic, University of Pennsylvania, CUPR—Center for Urban Policy Research, Rutgers University, 1999.

PAPERS

Analysis of Brake Perception-Reaction Times on High-Speed Signalized Intersection Approaches, by J.R. Setti, H. Rakha, and I. El-Shawarby, Virginia Polytechnic Institute & State University, IEEE ITSC06 Conference, Toronto, Canada, September 17-20, 2006.

Analytical Procedures for Estimating Capacity of Freeway Weaving, Merge, and Diverge Sections, by H. Rakha and Y. Zhang, Virginia Polytechnic Institute & State University, *Journal of Transportation Engineering*, Vol. 132(8), 2006, pp. 618-628.

Analytical Procedures for Estimating Capacity of Type B Weaving Sections, by H. Rakha and Y. Zhang, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

Applications of Automobile Emissions Modeling to Airport System Planning, Transportation Research Circular, by H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, presented at the 80th Annual Meeting of the Transportation Research Board Workshop, 2002.

Assessing the Potential of Using Traffic Simulation Model Results for Evaluating Automatic Incident Detection Algorithms, by B. Hellinga, H. Rakha, and M. Van Aerde, Virginia Polytechnic Institute & State University, Intelligent Transportation Systems Safety and Security Conference, Miami, Florida, March 24-25, 2004.

Assessing the Occlusion Effect of Large-Dimension Vehicles on Traffic Signs at Multilane Highways, by A. Al-Kaisy, J. Bhatt, and H. Rakha, Virginia Polytechnic Institute & State University, *Journal of Transportation Engineering*, Vol. 130 (5), 2004, pp. 648-657.

Bicycle-Friendly Shoulder Rumble Strips, by D. Torbic, M. El-Gindy, L. Elefteriadou, and Z. Jiang, *International Journal of Vehicle Design*, 2003, Vol. 33, No. 4, pp. 440-466.

Boarding and Alighting Injury Experience with Different Station Platform and Car Entranceway Designs on U.S. Commuter Railroads, by E. Morlok, B. Nitzberg, and L. Lai, University of Pennsylvania, *Accident Analysis and Prevention*, Vol. 36, No. 2 (2003), pp. 261-271.

Calibration of TRANSYT Traffic Dispersion Model: Issues and Proposed Solutions, by M. Farzaneh and H. Rakha, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

Case Study Evaluation of Throughput, Energy, Environmental and Safety Impacts of Traffic Signal Coordination: Field and Modeling Results, by H. Rakha, A. Medina, H. Sin, F. Dion, M. Van Aerde, and J. Jenq, Virginia Polytechnic Institute & State University, International Road Federation Conference, Paris, June 2001.

Case Study Operational and Safety Evaluation of an Interstate Highway, by A. Medina, S. Lee, and H. Rakha, Virginia Polytechnic Institute & State University, Intelligent Transportation Systems Safety and Security Conference, Miami, March 24-25, 2004.

Comparison and Calibration of FRESIM and INTEGRATION Steady-state Car-following Behavior, by H. Rakha and B. Crowther, Virginia Polytechnic Institute & State University, accepted for publication in *Transportation Research: Part A*, 2002.

Comparison of Delay Estimates at Undersaturated and Oversaturated Pretimed Signalized Intersections, by F. Dion, H. Rakha, and Y. Kang, Virginia Polytechnic Institute & State University, Transportation Research Board, 2001.

Comparison of Delay Estimates at Undersaturated and Oversaturated Pretimed Signalized Intersections, by F. Dion, H. Rakha, and Y. Kang, Virginia Polytechnic Institute & State University, tentatively accepted for publication in *Transportation Research: Part B*, 2002.

Comparison of Delay Estimates at Under-saturated and Over-saturated Pretimed Signalized Intersections, by F. Dion, H. Rakha, and Y.S. Kang, Virginia Polytechnic Institute & State University, *Transportation Research, Part B: Methodological*, Vol. 38(2), 2004, pp. 99-122.

Comparison of Greenshields, Pipes, and Van Aerde Car-following and Traffic Stream Models, by H. Rakha and B. Crowther, Virginia Polytechnic Institute & State University, accepted for publication in the *Transportation Research Record*, 2002.

Comparison of Static Maximum Likelihood Origin-Destination Formulations.

Transportation and Traffic Theory: Flow, Dynamics and Human Interaction, by H. Rakha, H. Paramahamsan and M. Van Aerde, Virginia Polytechnic Institute & State University, Proceedings of the 16th International Symposium on Transportation and Traffic Theory (ISTTT16), 2005, pp. 693-716.

Comparison of TRANSIMS' Light Duty Vehicle Emissions with On-road Emission Measurements, by M. Jeihani, K. Ahn, A. Hobeika, H. Sherali, and H. Rakha, Virginia Polytechnic Institute & State University, 47th Annual Transportation Research Forum, New York, NY, March 23-25 2006.

Comparison of Web-based Road-Weather Information from Three States, A. Fayish and P. Jovanis, The Pennsylvania State University, Transportation Research Board Annual Meeting, CD, January 2004 (accepted for publication in Transportation Research Record Series).

Consistency of Shock-wave and Queuing Theory Procedures for Analysis of Roadway Bottlenecks, by H. Rakha and W. Zhang, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

Coordination of Traffic Signals across Jurisdictional Boundaries: Field and Simulation Results, by H. Rakha, A. Medina, H. Sin, F. Dion, M. Van Aerde, and J. Jenq, Virginia Polytechnic Institute & State University, presented at the 79th Annual Meeting of the Transportation Research Board, Washington D.C., January 2000.

Coupled Evaluation of Communication System Loading and ATIS/ATMS Efficiency, by B. Hellinga, H. Rakha and M. Van Aerde, Virginia Polytechnic Institute & State University, *International Journal of Vehicle Information and Communication Systems*, Vol. 1, No. 1/2, 2005, pp. 56-68.

Design and Evaluation of Peripheral Transverse Bars to Reduce Vehicle Speed, by B. Katz, D. Duke and H. Rakha, Virginia Polytechnic Institute & State University, Transportation Research Board 85th Annual Meeting, Washington D.C., CD-ROM [Paper 06-0577], 2006.

Developing a Decision Support System for Evaluating an Investment in Fare Collection Systems, by P. Ghandforoush, J. Collura, and V. Plotnikov, Journal of Public Transportation, National Urban Transit Institute, in press.

Developing Passenger Car Equivalency Factors for Heavy Vehicles during Congestion, by A. Al-Kaisy, Y. Jung, and H. Rakha, Virginia Polytechnic Institute & State University, Journal of Transportation Engineering, in press.

A Discrete Optimization Approach for Locating Automatic Vehicle Identification Readers for the Provision of Roadway Travel Times, by H. Sherali, J. Desai, H. Rakha, and I. El-Shawarby, Virginia Polytechnic Institute & State University, presented at the 82nd Annual Meeting of the Transportation Research Board, Washington D.C., 2003.

Dynamic Vehicle Routing with Time Window, by H. Xu and Z. Chen, University of Pennsylvania, presented at INFORMS Annual Meeting, San Jose, CA, November 2002, working paper.

Effect of Yellow-Phase Trigger on Driver Behavior at High-Speed Signalized Intersections, by I. El-Shawarby, H. Rakah, V. Inman, and G. Davis, Virginia Polytechnic Institute & State University, IEEE ITSC06 Conference, Toronto, Canada September 17-20, 2006.

Emission Model Development Using In-vehicle On-Road Emission Measurements, by H. Rakha, K. Ahn, I. El-Shawarby, and S. Jang, Virginia Polytechnic Institute & State University, 13th CRC ON-Road Vehicle Emissions Workshop, San Diego, CA, April 2003.

Estimated Demand for ITS-Enhanced Paratransit Services: Comparison of Elderly, Disabled and General Travelers, F. Gross and P. Jovanis, The Pennsylvania State University, submitted to Journal of Advanced Transportation, December 2003.

Estimating the Capacity of Freight Transportation Systems: A Model and Its Application in Transport Planning and Logistics, by E. Morlok and S. Riddle, University of Pennsylvania, Transportation Research Record No. 1653, 2000, pp. 1-8.

Estimating the Demand for Enhanced Paratransit Services by Elderly and Disabled Travelers, by W. H. Chen, F. Gross, K. Pecheux, P. Jovanis, Pennsylvania State University, Transportation Research Board annual meeting, CD, January 2004.

Estimating Demand for ITS-Enhanced Ridesharing Services by Elderly and Disabled Travelers, W. H. Chen, F. Gross, K. Pecheux, P. Jovanis, The Pennsylvania State University, in review, Transportation Engineering Journal of ASCE, October, 2003.

Estimating Modal Preference between ITS-Enhanced and Existing Paratransit Services, W. H. Chen, F. Gross, K. Pecheux, and P. P. Jovanis, The

Pennsylvania State University, Transportation Research Board, 83rd Annual Meeting CD-ROM, January 2004.

Estimating Spatial Travel Times using Automatic Vehicle Identification Data, by F. Dion and H. Rakha, Virginia Polytechnic Institute & State University, presented at the 82nd Annual Meeting of the Transportation Research Board, Washington D.C., 2003.

Estimating Traffic Stream Space-mean Speed and Reliability from Dual and Single Loop Detectors, by H. Rakha and W. Zhang, Virginia Polytechnic Institute & State University, Transportation Research Record (in press).

Estimating Vehicle Stops at Under-Saturated and Over-Saturated Fixed-Time Signalized Intersections, by H. Rakha, Y. Kang, and F. Dion, Virginia Polytechnic Institute & State University, presented at the 80th Annual Meeting of the Transportation Research Board, Washington D.C., January 2001.

Evaluating Alternative Lane Management Strategies along I-81, by H. Rakha, A. Medina, K. Ahn, I. El-Shawarby, and M. Arafeh, Virginia Polytechnic Institute & State University, Transportation Research Record, in press.

Evaluation of Green Extension Transit Signal Priority Strategies using Portable GPS Receivers, by K. Ahn, H. Rakha and J. Collura, Virginia Polytechnic Institute & State University, Transportation Research Board 85th Annual Meeting, Washington D.C., CD-ROM [Paper 06-0641], 2006.

Evaluation of Potential Transit Signal Priority Benefits along a Fixed-Time Signalized Arterial, by F. Dion, H. Rakha, and Y. Zhang, Virginia Polytechnic Institute & State University, accepted for publication in the ASCE Journal of Transportation Engineering, 2003.

Evaluation Results of the San Antonio AWARD System, by R. Sivanadan, M. Van Aerde, H. Rakha, F. Dion, and A. Switzer, Virginia Polytechnic Institute & State University, presented at the 10th ITS America Annual Meeting and Exposition, Boston, MA, 2000.

Evaluation of Service Reliability Impacts of Traffic Signal Priority Strategies for Bus Transit, by J. Chang, J. Collura, F. Dion, and H. Rakha, Virginia Polytechnic Institute & State University, accepted for publication in the Transportation Research Record, Journal of the Transportation Research Board, 2003.

Evaluation of Traffic Signal Coordination Case Study: Field and Modeling

Results, by H. Rakha, A. Medina, H. Sin, F. Dion, and M. Van Aerde, Virginia Polytechnic Institute & State University, accepted for presentation at the 14th International Road Federation World Congress, to be held in Paris, France, June 2001.

Evaluation of Transit Signal Priority Benefits along a Fixed-Time Signalized Arterial, by F. Dion, H. Rakha, and Y. Zhang, Virginia Polytechnic Institute & State University, Transportation Research Board 81st Annual Meeting, Washington D.C., January 2002.

Field and Driving Simulator Validations of System for Warning Potential Victims of Red-Light Violators, by V. Inman, G. Davis, I. El-Shawarby and H. Rakha, Virginia Polytechnic Institute & State University, Transportation Research Board 85th Annual Meeting, Washington D.C., CD-ROM [Paper 06-0390], 2006.

Field Evaluation Approach for Quantifying Network-wide Efficiency, Energy, and Emission Impacts of Operational-Level Projects, by H-G. Sin, Virginia Polytechnic Institute & State University, Ph.D. Thesis, 2001.

Field Evaluation of Efficiency, Energy, Environmental and Safety Impacts of Traffic Signal Coordination across Jurisdictional Boundaries, by H. Rakha, A. Medina, H. Sin, F. Dion, M. Van Aerde, and J. Jenq, Virginia Polytechnic Institute & State University, Transportation Research Record, No. 1727, 2000, pp. 42-51.

Field Evaluation of Energy and Emission Impacts of Traffic Flow Improvement Projects using GPS Data: Issues and Proposed Solutions, by H. Rakha, F. Dion, and H. Sin, presented at the 80th Annual Meeting of the Transportation Research Board, Washington D.C., January 2001.

Field Evaluation of Safety Impacts of Adaptive Cruise Control, by H. Rakha, J. Hankey, A. Patterson, and M. Van Aerde, Virginia Polytechnic Institute & State University, ITS Journal, Vol. 6, 2001, pp. 1-35.

Field Evaluation of Weigh-in-Motion Screening on Truck Weigh Station Operations, by H. Rakha, B. Katz and A. Al-Kaisy, Virginia Polytechnic Institute & State University, Accepted for publication in the *ITS Journal*, In press.

Finite Element Modeling of Rigid Pavements, by S. Shoukry and G. William, and M. Riad, West Virginia University, CD Proceedings of the 2nd

International Symposium on Maintenance and Rehabilitation of Pavements and Technological Control, Auburn, Alabama, Paper No. 01-120, 2001.

Field Monitoring and Three-Dimensional Finite-Element Modeling of Integral Abutment Bridge in West Virginia, by S. Shoukry, G. William, M. Riad, and K. McBride, West Virginia University. Presented at the 85th Annual Transportation Research Board meeting, Washington, D.C., paper 06-1499.

Framework for the Analysis of Grocery Teleshopping, by J. Marker and K. Goulias, The Pennsylvania State University, Transportation Research Record, 1725, 2000, pp.1-8.

Framework for Estimating Network-wide Safety Impacts of Intelligent Transportation Systems, by A. Avgoustis, H. Rakha, and M. Van Aerde, Virginia Polytechnic Institute & State University, Intelligent Transportation Systems Safety and Security Conference, Miami, March 24-25, 2004.

A Framework for the Evaluation of System Safety Benefits of Intelligent Cruise Control Systems, by M. Van Aerde and H. Rakha, Virginia Polytechnic Institute & State University, ITS Journal, Vol. 5, 1999, pp. 163-189.

Genetic Algorithm Approach for Locating Automatic Vehicle Identification Readers, by M. Arafeh and H. Rakha, Virginia Polytechnic Institute & State University, 8th IEEE International Conference on Intelligent Transportation Systems (ITSC), Vienna, Austria, CD-ROM [Paper FA6.1], September 13-16, 2005.

Identifying Trip-Based Explanatory Variables for Estimating Hot-Stabilized Light-Duty Gasoline Vehicle Fuel Consumption and Emission Rates, by Y. Ding and H. Rakha, Virginia Polytechnic Institute & State University, Third International Conference on Air Quality, Loutraci, Greece, March 2001.

Impact of Differences in Driver Desired Speed on Steady-State Traffic Stream Behavior, by M. Farzaneh and H. Rakha, Virginia Polytechnic Institute & State University, Transportation Research Board 85th Annual Meeting, Washington D.C., CD-ROM [Paper 06-0926], 2006.

Impact of Tire and Aerodynamic Aids on Truck Performance along Upgrade Sections, by H. Rakha and B. Yu, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

Impact of Vehicle Stops on Hot Stabilized Light-Duty Vehicle Energy and Emission Rates, by H. Rakha and Y. Ding, Virginia Polytechnic Institute & State University, presented at the 80th Annual Meeting of the Transportation Research Board, Washington D.C., January 2001.

Impact of Vehicle Stops on Hot Stabilized Light-Duty Vehicle Energy and Emission Rates, by H. Rakha and Y. Ding, Virginia Polytechnic Institute & State University, accepted for publication in the ASCE Journal of Transportation Engineering, 2002.

Improving the Energy Efficiency of Freight in the United States Through Commodity-based Analysis: Justification and Implementation, by F. M. Vanek and E. K. Morlok, University of Pennsylvania, Transportation Research-D, Vol. 5, No. 1 (2000), pp. 11-29.

Information Technology Innovations in Public Transportation, by J. Collura, Transportation Engineer's Handbook, McGraw-Hill, forthcoming.

Integrated Survey Design for a Household Activity-Travel Survey in Centre County, Pennsylvania, by M. Patten and G. Goulias, submitted August 2003 for Transportation Research Board annual meeting, Washington, D.C.

The INTEGRATION 2.30 Framework for Modeling Lane-Changing Behavior in Weaving Sections, by H. Rakha and Y. Zhang, Virginia Polytechnic Institute & State University, Transportation Research Record: Journal of the Transportation Research Board, No. 1883, 2004, pp. 140-149.

The INTEGRATION Modeling Framework for Estimating Mobile Source Emissions, by H. Rakha and K. Ahn, Virginia Polytechnic Institute & State University, Fourth International Conference on Urban Air Quality Proceedings, Prague, Czech Republic, March 2003.

Integration of Transit Signal Priority Within Adaptive Traffic Signal Control Systems, by F. Dion and H. Rakha, Virginia Polytechnic Institute & State University, Transportation Research Board 84th Annual Meeting, Washington D.C., CD-ROM [Paper 05-0926], 2005.

Invited Remarks on the 20th Anniversary of SEPTA Commuter Rail Service and of the Delaware Valley Association of Railroad Passengers, by E. Morlok, University of Pennsylvania, The Delaware Valley Rail Passenger, March-April 2003, pp. 10-11.

A Level-2 Reformulation-Linearization Technique Bound for the Quadratic Assignment Problem, by P. Hahn, W. Adams, M. Guignard, and W. Hightower, University of Pennsylvania, submitted to the European Journal of Operational Research, 2003.

A Longitudinal Analysis of Awareness and Use for Advanced Traveler Information Systems, by K. Goulias, T. Kim, and O. Pribyl, The Pennsylvania State University, paper presented at the European Commission Workshop on Behavioral Responses to ITS April 1-3, 2003, Eindhoven, the Netherlands.

A Longitudinal Analysis of Awareness and Use for Advanced Traveler Information Systems, by K. Goulias, T.G. Kim, and O. Pribyl, presented at the Transportation Research Board annual meeting, Washington, D.C., January 2004.

Macroscopic Modeling of Traffic Dispersion: Issues and Proposed Solutions, by H. Rakha and M. Farzaneh, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

Measuring Capacity Flexibility of a Transportation System, by E. K. Morlok and D. J. Chang, University of Pennsylvania, Transportation Research-A, in press, 2004.

Mesoscopic Fuel Consumption and Emissions Model [In French], by F. Dion, H. Rakha, and A. Manar, Virginia Polytechnic Institute & State University, presented at the 36th Annual Meeting of the Quebec Transportation and Road Association: Laval, Quebec, 2001.

Mesoscopic Fuel Consumption and Vehicle Emission Rate Estimation as a Function of Average Speed and Number of Stops, by F. Dion, M. Van Aerde, and H. Rakha, Virginia Polytechnic Institute & State University, presented at the 79th Annual Meeting of the Transportation Research Board, Washington D.C., January 2000.

Microscopic Modeling of Vehicle Start Emissions, by H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, accepted for publication in the Transportation Research Record, Journal of the Transportation Research Board, 2003.

Microscopic Modeling of Vehicle Start Emissions, by H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, presented at the 82nd Annual Meeting of the Transportation Research Board, Washington

D.C., January 2003.

Microsimulation of Traffic with and without Adaptive Cruise Control: Model Logic, by M. Van Aerde and H. Rakha, Virginia Polytechnic Institute & State University, 9th International Conference on Mechatronics Technology, Kuala Lumpur, Malaysia, CD-ROM, December 2005.

Model Preference for ITS-Enhanced Ridesharing and Paratransit Services for Disabled and Elderly Travelers, by W. H. Chen, F. Gross, K. Pecheux, and P. P. Jovanis, The Pennsylvania State University, *Advances in Transportation Studies*, An International Journal, Issue 5, 2005.

Modeling Drivers Parking Decision Strategies: Advanced Parking Management Systems, by A. Holton, D. Fisher, and J. Collura, Virginia Polytechnic Institute & State University, accepted by the ASCE Journal of Transportation Engineering, in press.

Modeling the Effect of Heavy Vehicles on Sign Occlusion at Multilane Highways, by A.F. Al-Kaisy, J. Bhatt and H. Rakha, Virginia Polytechnic Institute & State University, *Journal of Transportation Engineering*, ASCE Publications, Vol. 131(3), 2005, pp. 219-229.

The Need for a New Commuter Car Entranceway Design for Mixed High and Low Level Platforms, by E. Morlok, University of Pennsylvania, Transportation Research Record No. 1793, 2002, pp. 40-46.

Patterns of Information and Telecommunication Use and Attitudes in the Pennsylvania Turnpike Traveler Information System, by M. Patten, K. Goulias, and O. Pribyl, The Pennsylvania State University, paper presented at the 82nd Transportation Research Board Meeting and included in the CD ROM proceedings, Washington D.C., January 2003.

Prevalence of Traffic Safety Content in Graduate Engineering and Public Health Programs, by F. Gross and P. P. Jovanis, The Pennsylvania State University, Transportation Research Board Joint Subcommittee on Safety Workforce Development (draft), 2005.

Proposed Method to Evaluate Emergency Vehicle Preemption and the Impacts on Safety, by C. Louisell, J. Collura, and S. Tignor, Proceedings of the ITS Annual Meeting, Minneapolis, 2003.

Reducing Passenger and Employee Boarding and Alighting Accident Rates on Mixed High and Low Platform Railroad Lines, by E. Morlok, University of Pennsylvania, paper presented at the 82nd Annual Meeting of the Transportation Research Forum, Washington, D.C., January 2003.

Remote Health Monitoring and Modeling of Star City Bridge, West Virginia, by M. Riad, S. Shoukry, G. William, West Virginia University. Presented at the 84th Annual Transportation Research Board Meeting, Washington, D.C., paper 06-2943.

On the Relationship between Travel Behavior and Information and Communications Technology (ICT): What do the Travel Diaries Show, by K. Viswanathan, K. Goulias, and T-G. Kim, The Pennsylvania State University, Urban Transport VII, Urban Transport and the Environment for the 21st Century (Ed. L.J. Sacharov and C.A. Brebbia), WIT Press, Southampton, UK, 2001, 213-222 pp.

Resolving the Conflict between Mobility-Impaired Passenger Requirements and Freight Service on Mixed High and Low Level Platform U.S. Railroad Lines, by E. Morlok, University of Pennsylvania, Transportation Research Record, No. 1848, (NAS-NRC, 2003), pp. 70-78.

Safety Implications of Multi-day Driving Schedules for Truck Drivers: Comparison of Field Experiments and Crash Data Analysis, by S. W. Park, A. Mukherjee, F. Gross, and P. P. Jovanis, The Pennsylvania State University, Transportation Research Board, 84th Annual Meeting CD-ROM, January 2005.

Simulating No-Passing Zone Violations on a Vertical Curve of a Two-lane Rural Road, by J. El-Zarif, A. Hobeika, and H. Rakha, Virginia Polytechnic Institute & State University, accepted for publication in the Transportation Research Record, 2002.

Solving a Practical Pickup and Delivery Problem, by H. Xu, Z.-L. Chen, S. Rajagopal, and S. Arunapuram, University of Pennsylvania, Transportation Science, Vol. 37 (2003), pp. 347-364.

Some Guidelines for Selecting Micro-simulation Models for Interchange Traffic Operational Analysis, Fang, C. and L. Elefteriadou, Transportation Research Board Meeting, Washington, D.C., January 2004.

Speeding up Commuter Railroad Service – Comparative Actual Performance

of Different Platform and Train Designs, by E. K. Morlok and B. F. Nitzberg, University of Pennsylvania, Transportation Research Record, in press, 2004.

Static Maximum Likelihood Synthetic O-D Estimation Formulations, Assumptions, and Limitations, by H. Rakha, H. Paramahamsan, and M. Van Aerde, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

System-Wide Impacts of Green Extension Transit Signal Priority, by K. Ahn and H. Rakha, Virginia Polytechnic Institute & State University, IEEE ITSC06 Conference, Toronto, Canada, September 17-20, 2006.

Systematic Analysis of Capacity of Weaving Sections, by Y. Zhang and H. Rakha, Virginia Polytechnic Institute & State University, presented at the 84th Annual Meeting of the Transportation Research Board, Washington D.C., January 2005.

Testbed for Evaluating Automatic Incident Detection Algorithms, by H. Rakha, B. Hellenga, and M. Van Aerde, Virginia Polytechnic Institute & State University, Intelligent Transportation Systems Safety and Security Conference, Miami, Florida, March 24-25, 2004.

TRANSIMS: The Activity Generator Module, by A. Hobeika, et al., Virginia Polytechnic Institute & State University, Federal Highways Administration: Washington, D.C., August 2000.

TRANSIMS: The Microsimulation Module, by A. Hobeika, et al., Virginia Polytechnic Institute & State University Federal Highways Administration: Washington, D.C., September 2000.

TRANSIMS: The Population Synthesizer Module, by A. Hobeika, et al., Virginia Polytechnic Institute & State University, Federal Highways Administration: Washington, D.C., January 2001.

TRANSIMS: The Route Planner Module, by A. Hobeika, et al., Virginia Polytechnic Institute & State University, Federal Highways Administration: Washington, D.C., March 2000.

Transportation Systems Planning, Chapter 1 in Transportation Systems Planning: Methods and Applications, by K. Goulias, The Pennsylvania State University, edited by K. Goulias, CRC Press, Boca Raton, FL, 2003, 1-1 to 1-45 pp.

Travel Behavior and Values Research in Human-Centered Transportation Systems, by K. Goulias, The Pennsylvania State University, in Transportation in the New Millennium, State of the Art and Future Direction, Perspectives from Transportation Research Board Standing Committees, Transportation Research Board, National Research Council, The National Academies, Washington, D.C., 2003, 6 pp.

Trip-Based Explanatory Variables for Estimating Hot-Stabilized Light-Duty Gasoline Vehicle Fuel Consumption and Emission Rates, by Y. Ding and H. Rakha, Virginia Polytechnic Institute & State University, presented at the 81st Annual Meeting of the Transportation Research Board, Washington D.C., January 2002.

Trip-Based Explanatory Variables for Estimating Vehicle Fuel Consumption and Emission Rates, by Y. Ding and H. Rakha, Virginia Polytechnic Institute & State University, accepted for publication in Water, Air, and Soil Pollution, 2002.

Truck Modeling Along Grade Sections, by I. Lucic, Virginia Polytechnic Institute & State University, MS Thesis, 2001.

Truck Performance Curves Reflective of Truck and Pavement Characteristics, by H. Rakha and B. Yu, Virginia Polytechnic Institute & State University, Journal of Transportation Engineering, Vol. 130(6) (in press).

User Perceptions of Advanced Traveler Information Systems on the Pennsylvania Turnpike, by M. Patten, K. Goulias, and O. Pribyl, The Pennsylvania State University, paper presented at the 9th World Congress on Intelligent Transportation Systems, October 14-18, 2002, Chicago, IL.

User Perceptions of Web-Based Roadway Weather Information Systems (RWIS): Navigability, by A. C. Fayish, F. Gross, and P. P. Jovanis, The Pennsylvania State University, Transportation Research Board, 84th Annual Meeting CD-ROM, January 2005.

Validation of Van Aerde's Simplified Steady-State Car-following and Traffic Stream Model, by H. Rakha, Virginia Polytechnic Institute & State University, Transportation Research Board 85th Annual Meeting, Washington D.C., CD-ROM [Paper 06-0424], 2006.

Variable Power Vehicle Dynamics Model for Estimating Maximum Truck Acceleration Levels, by H. Rakha and I. Lucic, Virginia Polytechnic Institute & State University, accepted for publication in the ASCE Journal of

Transportation Engineering, 2002.

Vehicle Dynamics Model for Estimating Maximum Light Duty Vehicle Acceleration Levels, by H. Rakha, M. Snare, and F. Dion, Virginia Polytechnic Institute & State University, Transportation Research Record: Journal of the Transportation Research Board (in press).

Vehicle Dynamics Model for Predicting Maximum Truck Accelerations, by H. Rakha, I. Lucic, S. Demarchi, J. Setti, and M. Van Aerde, Virginia Polytechnic Institute & State University, ASCE Journal of Transportation Engineering, Sept./Oct. 2001 Issue.

Vehicle Routing with Cross Docking, by Z.-L. Chen, H. Xu, and S. Rajagopal, University of Pennsylvania, presented at INFORMS Annual Meeting, Miami Beach, Nov. 2001, and submitted for consideration for publication.

Vehicle Speed Profiles to Minimize Fuel Consumption, by D. J. Chang and E. K. Morlok, University of Pennsylvania, ASCE Journal of Transportation Engineering, 2004 – accepted for publication.

The VT-Micro Framework for Modeling of Hot Stabilized Light Duty Vehicle and Truck Emissions, by H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, presented at the 82nd Annual Meeting of the Transportation Research Board, Washington D.C., January 2003.

The VT-Micro Framework for Modeling of Hot Stabilized Light Duty Vehicle and Truck Emissions, by H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, Fourth International Conference on Urban Air Quality Proceedings, Prague, Czech Republic, March 2003.

The VT-Micro Framework for Modeling of Hot Stabilized Light Duty Vehicle and Truck Emissions, by H. Rakha, K. Ahn, and A. Trani, Virginia Polytechnic Institute & State University, accepted for publication in the Transportation Research: Part B, 2003.

Web-based Simulation and Decision Support System for Bulk Mail (Parcel) Network Planning, by C.H. Chen, P. M. Hahn, J. Lin, and E. K. Morlok, University of Pennsylvania, Proceedings of the 42nd Annual Meeting of the Transportation Research Forum, 2000, pp. 283-292.
